WORK EXPERIENCE

Full-Stack Web Developer

Irish Amateur Wrestling Association, CLG

2018 – 2021

- Developed a user interface and functionality for the official Irish Amateur Wrestling Association to support membership registration, event management and member only tournaments.
- Worked collaboratively to design and develop a web application that serves all the needs for member management.
- Optimised SEO target keywords to rank number 1 on Google.
- Set-up secure hosting on Digital Ocean servers and reduced hosting cost and loading speed.

Freelance Web Developer

Self-Employed

2018 – 2020

Worked on several projects as a freelance web developer

- Optimised WordPress websites for loading speeds and SEO by following best practices.
- Performed the duty of fixing technical issues with third party plugin integration, checkout payment services and user logins.
- Helped design and develop multi-level paid membership structure and paid content restriction.

EDUCATION

Bachelor of Science - Computer Science Infrastructure

Dublin Institute of Technology, Kevin Street

2012 – 2016

Involved in various projects and case studies that were presented for academic evaluation

Final Year Project:

- Researched and developed an automatic license plate recognition application using image processing.
- Wrote a neural network to recognise the digits 0-9 from over 1000 different samples and recognise the position and different types of Irish car registration plates.
- Success rate of over 90% of supplied video footage.
